

MOTORCYCLES + GOLF + MUSIC vs. CANCER

2009 RECIPIENT INFORMATION

Ashley Elizabeth Klem is 28 years old and was diagnosed with breast cancer on June 19th of this year. She has a mass in Stage 1 with the possibility that it has spread to her lymph nodes. Given her age and other circumstances, her cancer specialist has recommended a bilateral mastectomy followed by chemotherapy and Herceptin treatments. Because of obvious troubles in the economy, Ashley unfortunately has no health insurance.

Ashley was born January 27, 1981 in Conyers, GA and grew up on a 285 acre farm that has been in her mother's family for over one hundred years. She comes from a very artistic family with her mother being a landscape designer and her father working as a mechanical engineer. She has one older sister who is married with three children. Ashley attended high school in Rockdale County at Heritage High, where she played both soccer and volleyball until graduation in 1999. She then attended Georgia State University, gaining her BA degree in Studio Art in 2005. While at Georgia State University, Ashley was a member of the Delta Zeta sorority and studied abroad in France for one summer.

After working for over three years as a design consultant in the new home construction business, Ashley's company had to close its Atlanta office due to the ongoing recession... and along with it, lost her health insurance. She is presently working at Fado Irish Pub & Restaurant and has been blessed to meet many amazing fellow employees and patrons of the pub.

With golf and music events being planned for late October, TWO WHEEL DRIVER will be working through the fall of 2009 to raise money for Ashley while she focuses on what matters most.
